

ANTI RUST 4 DW

Product code: 265201201

Dewatering rust prevention fluid

This product is a light fluid based on solvents and corrosion inhibitors with hydrofugant properties. The product is water repelling and displacing and will leave a light film with good anti-rust properties.

Applications

This product can be used on all parts that have been treated with metalworking emulsions:

- Machined parts wet of grinding or soluble oils
- Parts quenched in water
- Parts or machinery that have been accidentally in touch with fluids
- Chemically worked parts
- Final protection for sheet steel and tubes

Benefits & Advantages

- Excellent anti rust protection
- Prevents corrosion risks
- Preliminary drying of parts is not necessary

Typical Performance Data

Typical	Value
Base oil type	Liquid with solvents
Density @ 20 °C, gr/cm ³	0.79
Flash point, °C	45
Type of film	Oily
Drying time, minutes	30
Chemical reaction	None
Indoor protection, months	6-9

All performance data on this Technical Data Sheet are indicative only and can vary during production.

Use

Can be applied by brushing, dipping or spraying. Like all thixotropic products, longer periods of storage can cause some precipitation. It is recommended agitate prior to use and empty drums totally. Removal by solvents or alkaline cleaners. To be applied at room temperature.
