

FOODMAX CHAIN LT

Product code: 263200801

Food grade oil for the lubrication of drive and conveyor chains in low temperature applications

This product is based on a blend of synthetic hydrocarbons and is inhibited against oxidation to give a long-wet film life over wide temperature. It is designed for the lubrication of conveyor chains and bearings running continuously at low temperatures, down to minimum of - 40°C and on chains that are moving slowly.

For drive and conveyor chains: apply sparingly by brush or oil can as required. Can also be applied automatically using a central drip feed system.

Benefits & Advantages

- Penetrates to the links and pins reducing wear and extending chain life
- Does not form hard carbon deposits
- Miscible with esters, mineral oils and other synthetic hydrocarbons
- Avoids high speed splashing and therefore staining of fabrics
- Excellent anti-wear properties
- Low volatility that reduces the evaporation residues

Typical Performance Data

Typical	Value
Colour	0.5
Density @ 20°C, g/ml	0.82
Viscosity @ 40°C, cSt	17
Viscosity @ -40°C, cSt	2500
Viscosity Index	125
TAN, mgKOH/g	<1
Flash Point, °C	>220
Pour Point, °C	<-60
NSF Approval	151578
Kosher Approval	yes
Halal Approval	yes
