

FOODMAX GREASE CAS M 2

Product code: 263700801

Food grade high performance grease with high resistance to heavy loads based on a white oil

Foodmax Grease CAS M 2 is member of a family of technologically advanced greases which have been developed by complexing modified overbased calcium sulphonates. This technology is characterized by exceptional mechanical stability, high dropping point, high load carrying performance, reduced wear and excellent resistance to water and steam and corrosion. This technology equals and in many ways outperforms other premium, high temperature greases such as lithium complex, aluminium complex and polyurea.

This product is a certified H-1 grease for incidental contact with food. It is designed for use in all food processing operations including mixing, stirring, baking, frying, cooking, cleansing, packaging, canning and bottling.

Benefits & Advantages

- Superior mechanical stability versus other thickeners, particularly in the presence of heat and water
- Resistant against cold & hot water and alkali-based cleaners
- Adheres to metal surfaces
- High dropping point, typically more than 300 °C
- Excellent EP and AW properties inherent in the thickener
- Does not require the use of additional additives
- Contains no colorant (Titanium Dioxide TiO₂)
- Sulphonates are known and used for their excellent rust prevention properties
- Formulated for enhanced resistance to water
- Excellent corrosion resistance
- Formulated with a white oil
- Life performance is typically increased by two to three times that of a regular mineral oil-based grease
- Suitable for centralized lubrication systems
